

Matthew Young

San Francisco, CA | y.matt12@gmail.com | 650-346-3166
linkedin.com/in/matthew-young-07 | gitlab.com/matthewyoung777

Technical Skills

Programming | Python, Javascript ES6+, Java
Back End | Django, Node.js, Fast API, MongoDB, PostgreSQL, REST APIs, Rabbit MQ,
Front End | React.js, Bootstrap, DOM manipulation, HTML 5, CSS
System Design | Docker, Microservices, Monoliths, Domain-driven design, Heroku, Data Modeling

Application Development Experience

Paper Stonks App | *stock trading application* | <https://gitlab.com/apex-legends1/paper-stonks> 2022

- Designed and implemented a scalable and secure **REST API** for data access using **FastAPI**
- Built front end UI components in **React** integrating Chart.js and real time stock data
- Containerized microservice architecture with **Docker**
- Automated **CI/CD** pipelines utilizing **GitLab** while cultivating a 5-member team to meet goals.

Car dealership CRM App | gitlab.com/matthewyoung777/project-beta

Software application to handle vehicle services, sales, and inventory for a dealership 2022

- Created a dynamic front-end user interface for inventory and service scheduling in **React**
- Developed **REST API** for data access using **Django** for the appointment microservice
- Containerized microservice architecture with **Docker**
- Collaborated as a team using **GitLab** branches and version control

Project Management Board App | gitlab.com/matthewyoung777/project-alpha-apr

2022

Project board for task delegation

- Developed back-end models and databases using Django ORM
 - Produced application UI by integrating Django templates
-

Professional Experience

Cruise - Autonomous Vehicle Test Specialist | San Francisco, CA

2019-2022

- Increased drivable testing zones by 50% through advanced mapping techniques
 - Pinpointed and communicated problematic drive behavior data for the engineering team
 - Trained fleet ops for vehicle testing to achieve 2x mileage accumulation
-

Education

Hack Reactor | **Advanced Software Engineering Immersive Program Certificate**

2022

Full stack application development with 1000+ hours of coding including Python, Django, Javascript, React.js, and PostgreSQL in an AGILE environment.

University of Washington Seattle | **Bachelor of Arts in Economics**

2019

Object-Oriented Programming, Data Structures/Algorithms, Data Analytics, Statistics, Econometrics
